SUBJECT INDEX

Acoustic properties of human skull bone, 325
Adhesive strength of cyanoacrylate bonds, 159
Amino acid polymers, 53
Antimicrobial urethral catheter, 129
Biodegradable poly(lactic acid) polymers, 169
Cellulosic membranes, 459
Cuprophane, 3
Degradation of blood in a shear field, 315
Dental amalgam, 489, 503, 515
Dimethylaminoethyl methacrylate copolymers, 415
Effect of porosity of heterogeneous poly(glycol monomethacrylate) gels, 447
Elastic behavior of dental amalgam, 515
Elastic constants of dental amalgam, 489
Fatigue behavior of type 316 stainless steel, 267
Flexural properties of equine metacarpus, 63
Frictional coefficients, 3
Gold-Iron binary, 283
Hard tooth structures, 159
Hydron, 17
Inert and resorbable ceramics, 25
Internal fixation plates, 389
L-Leucine DL-Methionine copolymers, 53
Liver, 17
Lytic effects of plastics surfaces, 207
Membrane characteristics, 3
Methacrylic polymers, 183
Microcapsule artificial kidney, 409
Permeability, 53
Polyelectrolyte complex membranes, 287
Poly(glycol monomethacrylate) gels, 447
Polymers in ophthalmic surgery, 113
Poly(*N*-substituted methacrylamides), 197
Porous ceramic, 81
Pump sets, 411
Radiopaque denture base materials, 245, 253, 335, 359
Segmented polyurethane IL, 373
Solute transport, 287
Species differences in fibrinolysis and blood coagulation, 121
Spherical gamma particles, 307
Sterilization problems of synthetic biocompatible materials, 139
Tin in the γ_1 phase of dental amalgam, 239
Tolerance of modified poly(glycol methacrylates), 225
